Works great with the  
**Foamer Simpson**

**InVade**  
bio foam™

Eating the Scum  
of the Earth!™

Contains Microbes, Citrus Oil and Foaming Agent

**InVade**  
bio foam™

### Directions for Use Cont.

Prime areas include peeling away baseboards, machinery cracks, beverage line bundles, beverage fountain drip trays, and voids around dishwashers and tray conveyors. The foam will take a few hours to dissipate and should be left and not washed up.

Contact us for recommendations for other applications.

Precautions: Keep out of reach of children. If swallowed, seek medical attention immediately. Give one glass of water and do not induce vomiting. Wash hands well after use. If in eyes, remove contacts and flush with water for 15 minutes. Seek medical attention for any persistent irritation. Store in a closed, appropriately labeled container, out of reach of children, between 35 and 95 °F.

### Directions for Use

InVade Bio Foam contains premium, scum-eating, odor eliminating microbes, citrus oil and foaming agent. Dilute at a rate of 1 oz per quart of water (4 oz per gallon) and place in the Foamer Simpson or similar hand foamer or power foamer. The product may be blended with an IGR and/or pyrethroid or non-repellent insecticide (and the pesticide label must then be followed). Do not blend with other chemicals.

Foam cracks, crevices, drains and other scummy areas where flies may be breeding. Remember fruit flies often aren't just breeding in drains. Do not apply directly to a food contact surface unless the surface is thoroughly disinfected after treatment.
